DETAILED ACTION

Response to Amendment

1. Applicant's request for continuing examination (RCE), amendment and accompanying remarks filed 3/17/08 and 1/30/08 have been fully considered and entered. Claims 1 and 6 have been amended as requested. Applicant's amendments are not found patently distinguishable and Applicant's arguments are not found persuasive of patentability for reasons set forth herein below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1,3-7 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Newly amended claim 1 is considered indefinite because of the comprising language that follows the consisting of language. Specifically, Applicant recites at least one heat sealable ply "consisting of natural and synthetic fibers" followed by the limitation of "wherein each synthetic fibers "comprises" a fiber blend. Such conflicting language raises 112 2nd indefinite issues because the open language of comprises with respect to the fiber blend allows for the possibility of other materials (e.g., fillers, pigments, particulates..etc) which conflict with the "consisting of" language, which allows for only natural and synthetic fibers. Claims 3-7 and 11 are rejected for their dependency on claim 1.

Allowable Subject Matter

5. The following is a statement of reasons for the indication of allowable subject matter:
Claims 1, 3-7 and 11.

Notwithstanding the 112 2nd paragraph rejections set forth above, independent claim 1 is found allowable over the combination of prior art. Specifically, the combination of prior art fails to teach or fairly suggest the claimed air permeability rate and Applicant has sufficiently evidenced that the claimed rate is not an inherent feature to the prior art. An updated art search did not produce any new substantial art for which to base a rejection and presently no motivation exists to combine references to form an obviousness type rejection. Claims 3-7 and 11 are also found allowable as they depend either directly or indirectly from claim independent claim 1.
